HW 6

Flip dan invert gambar

Diberikan $n \times n$ binary matrix image, flip image secara horizontal, kemudian kita balik.

Contohnya, jika kita flip [1,1,0] secara horizontal kita mendapat [0,1,1]. Dan, jika kita invert [0,1,1] kita mendapat [1,0,0].

Contoh:

Input: image = [[1,1,0,0],[1,0,0,1],[0,1,1,1],[1,0,1,0]]

Output: [[1,1,0,0],[0,1,1,0],[0,0,0,1],[1,0,1,0]]

Penjelasan: Kita flip: [[0,0,1,1],[1,0,0,1],[1,1,1,0],[0,1,0,1]]. Kemudian kita invert: [[1,1,0,0],[0,1,1,0],[0,0,0,1],[1,0,1,0]]
